Enhancing Student Career Readiness

It begins with a great resume.

A candidate's self confidence during interview process has significant influence and affects recruiters' decisions and respectively hiring results.

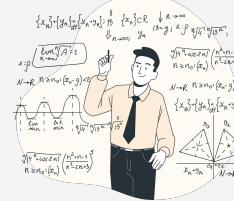

— Andreas Dimopoulos

Dimopoulos, Andreas. "Applicant's Self Confidence Influence in Employment Interview Process According to Recruiters Perceptions. An Exploratory Study in Greece" International Journal of Human Resource Studies [Online], Volume 10 Number 2 (17 March 2020)

Factors affecting their confidence

Self-efficacy & skill perception

Translating academics into skills

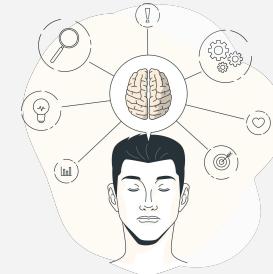

Consistency between resume & actual skills

Not knowing what to exclude

Identifying what recruiters want

Perceived uniqueness

A well-made,
thoughtful resume
can fix most of
these.

Woah, I'm blank.

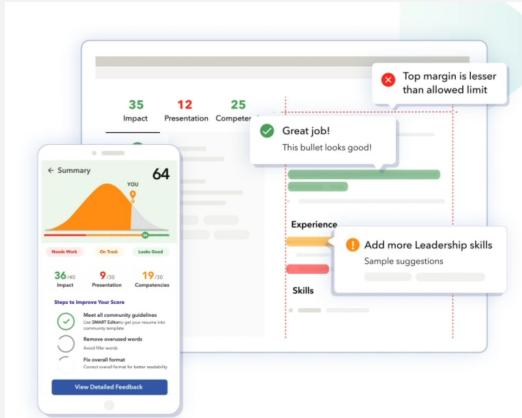

Struggling with what to write in a resume is one of the most common problems students face.

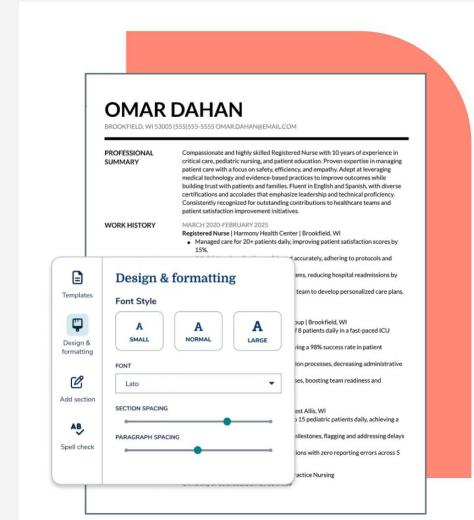

Resume builders don't help with writing

They either give feedback on the current resume...

... or help with formatting
